AB The title compns. comprise titanate coupling agents, radically polymerizable monomers, trialkylboron or their partial oxides, and optionally acidic group-contg. polymerizable monomers. Thus, a mixt. of 98 parts Me methacrylate (I) and 2 parts Plenact KR-7 (isopropylidemethacrylisostearoyl titanate) was spread on surfaces of two 3-mm Ti disks having diam. 10 and 6 mm, resp., dried, then a mixt. of I 100, Super-Bond Catalyst (tributylboron partial oxide) 40, and Super-Bond Opaque Ivory (PMMA) 60 parts was spread on the both coatings, then the disks were bonded with the coated surfaces to give a sample specimen, which showed shear bonding strength 26.5 and 14.5 MPa, before and after 50,000 cycles of 1 min each in cold water at 4.degree. and in hot water at 60.degree., resp.

IT ***Dental*** materials and appliances

(alloys, titanium or titanium, adhesives for, methacrylate polymer compns. contg. titanates and trialkylborons as)

IT Adhesives

(self-crosslinking, methacrylate polymers, contg. titanates and trialkylborons, for ***dental*** titanium, heat-shock-resistant)

IT ***138283-05-3*** ***138283-06-4*** ***138283-07-5***

138283-08-6

RL: USES (Uses)

(adhesives contg., curable, for ***dental*** titanium, heat-shock-resistant)

IT 7440-32-6, Titanium, miscellaneous

RL: MSC (Miscellaneous)

(***dental*** , adhesives for, methacrylate polymer compns. contg. titanate coupling agents and trialkylborons as)

IT 122-56-5D, Tributylboron, partially oxidized 95508-14-8, Super-Bond

RL: USES (Uses)

(methacrylate polymer adhesives contg., with titanate coupling agents, for ***dental*** titanium)
